

Building a Culture of Health Across the United States

Health Policy Research Scholars brings together diverse first- and second-year doctoral students hailing from populations traditionally underrepresented in doctoral programs and policy development. Participants will help diversify the next generations of leaders and ensure that policies and solutions are inclusive and relevant to the communities they serve. The map below indicates the home communities of the 40 participants in *Health Policy Research Scholars*. The reverse page lists the participant names, locations, areas of interest and academic institutions.

Locations, Participants and Academic Institutions
